STREET LIGHTING

ASSET MANAGEMENT EXPERT

Street Lighting and associated electrical highway asset management by its very nature is complex. With exceedingly high volumes of assets, intricate connectivity and a tendency for unexpected faults and failures any system needs to be comprehensive, flexible and enable quick solutions. AMX puts you in control, from a quick response to daily fault reports to strategic oversight of KPI management, ensuring you have accurate, up to date information to ensure your region stays switched on.

Key Features

▷ REPORT ON KPI'S EASILY – time to repair, completed inspections, pass rates, conditions scores, etc

▷ HIGH VOLUME ASSET INVENTORY with comprehensive detail improves quality of data held

▷ SIMPLE, RAPID LIVE DATA INTERROGATION to support all reporting requirements from Charge Code submission to APSE reports, with exportable charts, graphs and maps

▷ CUSTOMISED FAULT PROCESSES to handle fault reports from multiple sources with differing priorities and allocate repair to appropriate teams (internal or external)

▷ MOBILE VISUAL, STRUCTURAL AND ELECTRICAL INSPECTIONS for quick and accurate data capture and response

▷ PLAN AND DELIVER ROUTINE MAINTENANCE REGIMES to meet various scheduling approaches including risk based frequency calculations

Asset Types

- Light Units (incl LED)
- Feeder Pillars
- Illuminated Signs
- Bollards
- Zebra & School Crossings
- Subway & Building Lights
- Cameras
- Traffic Signals

Why choose AMX?

- Software that is flexible enough to deal with changing requirements including adding cameras, moving to LED, adding new contracts.
- Support and training for customising the system is considered, quick and effective immediately.
- Configuration puts the user in the driving seat – enabling full control of asset data capture, display and management, and relevant inspection and maintenance regimes.
- Integration with other decision support tools and financial systems can be easily accommodated.

"AMX enables us to quickly change an inspector's scheduled work to investigate a fault and then carry out routine works in the same vicinity. We are now operating ahead of schedule with our streetlighting inspections because of its versatility."
