

AMX 20th Anniversary

ASSET MANAGEMENT EXPERT

User Group 2024

INDUSTRY EXPERTS

We are very excited to have some incredibly experienced and Industry-savvy speakers at the AMX User Group 20th Anniversary in 2024. We look forward to hearing their insights and expertise in the asset management industry!

Craig McAdie is a senior project manager at the Environmental Agency with a plethora of experience in the industry. In addition to managing individual projects and programmes, he is also extensively involved with designing and managing strategic transformation initiatives, especially those that consolidate and acquire a better understanding of an organisation's data.

Topic: *Strengthening the Relationship with Your Data.*

Richard White's knowledge combines asset and information management, digital technology strategy and governance, data and analytics delivery and business change expertise with proven project and program delivery skills to define and drive work that is shaping the future of AtkinsRealis clients' businesses.

Topic: *Unlocking the power of Asset Information across the lifecycle.*

Harry Ching, Alex Harvey & Eric De Fleuriot. Champlain Bridge is one of the busiest infrastructure projects, linking Montreal with the mainland and providing a key commuting route for motorists in the city. Champlain Bridge was tasked with implementing an effective and customisable Asset Information Management System (AIMS) to steer its expansive structure's inspection, maintenance, and rehabilitation.

Topic: *The Champlain Bridge Corridor Project*
